

TO: ME 2171 Instrumentation Lab Instructional Staff

March 10th, 2025

FROM: Akinfoluhan Akinleye, ME 2171 Section 02

SUBJECT: Weekly Project Update 2

Last week, our primary goal was creating a project plan and distributing the procedures over the upcoming weeks. We successfully created a template and decided on out-of-class meeting times. We also received the immersive water heater, so we are ready to begin calibration.

Finally, we acquired a 500mL bottle of distilled water which we hope to use in our lab today. At the end of our lab, we should have acquired every equipment and determined which extra procedures we need to take for more accurate results.
